

EICC Membership & Total Elimination of Conflict Minerals

SMIC complies with the EICC Code of Conduct and maintains socially responsible business practices

Features

- 1 Senju Metal Group recognizes and respects the standards outlined by the EICC code of conducts.
- To comply with the EICC statement and completely eliminate the use of conflict minerals, Senju Metal Group confirmed with all of its tin (Sn) base metal sourcing companies and its smelters in writing that their minerals are conflict-free.
- In addition to obtaining a written certification, Senju Metal Group conducted on-site audits of tin (Sn) sourcing companies and smelters.
- As a result, it was verified that none of raw materials used by Senju Metal Group for its products have originated in the DRC and its surrounding conflict regions.
- If raw materials were ever found to be originated in the DRC or its surrounding conflict regions, Senju Metal Group will immediately discontinue the purchase.
- Senju Metal Group accepts the independent third-party audit designated by EICC
- 7 Senju Metal Group will provide the names of the above tin (Sn) base metal smelters to EICC.
- 8 Senju Metal Group will provide information on the traceability of tin (Sn) base metal to EICC.
